

# Buried Electrical Cable at Field Day Site

- May be an issue for ground rods
- Not generally an issue for antenna stakes/posts
- A Kolsol NF-820 cable finder was used to locate and map the buried electrical cables
  - Tie transmitter ground to a ground rod near an outlet
  - Tie transmitter signal to one side of the electrical circuit
  - Adjust TX level and RX sensitivity for scanning
- Buried electrical cable can be mapped and marked prior to Field Day
